

The Bulletin

Lockdown Edition [Issue 3]

Congratulations to our form stars of the week who have been recognised for their OUTSTANDING approach to learning...

- 7EW: Luci
- 7SC: Thomas R and Charlie
- 7ZA: Oscar R
- 7CH: Olivia B
- 8CL: Rubee and Ben
- 8MW: Aleks and Mia B
- 9EB: Jack T and Olivia
- 9RH: Honey and Ollie
- 10JS: Bradley
- 10JU: Connor and Aleks

COULD YOU BE A TORCH CHAMPION?

Each week teachers are invited to nominate a TORCH champion from their subject, a student who has shown great character strengths in their learning.

This week our nomination comes from science. Mrs Chewings has nominated Evie Livsey, Year 7, for her curiosity and hard work in researching Isaac Newton. Here is the fact-file she created for a home learning project. A great example of a well-considered piece of work that shows excellent research and writing skills. Well done Evie!

Isaac Newton
Fact file

Isaac Newton's story is one with a monstrous ego and believed that he is alone he can understand God's creations.

Isaac was born on Christmas morning on 25 December 1642 in Wools Thorse Lincolnshire. He was a tiny baby which gave him a small chance to live. The county that Newton was born in was chaotic and turbulent because England was being torn apart by the Civil War and more on top the Plague was an ever-present threat.

Newton father died before he was born but when he was three his mother left him with his grandmother to marry a man from a nearby village. Newton was scarred for life from this event and he felt rejected from his family. He hated his stepfather so much that he did threaten to burn their house down.

but he was sent to a school Grantham. When he got to the school, he found himself reading books and was unmoved by literature and poetry.

Newton went to the Trinity College Cambridge at college he found a father figure who set him out to make important discoveries. When Newton came home from college because of the plague this was the most productive period year of his life.

Newton continued to make experiments in his laboratory and his mix of theory and practice to many discoveries like redesigning a telescope and the discovery of gravity.

Newton found the theory of gravity when an apple landed on his head in an orchard in 1665 or 1666. It was the same force that motion of the moon. Newton calculated the force that the moon needs to orbit the earth and compared it to force of apple falling to the ground.

FEATURE SUBJECT

Geography - Miss Humber

Geography at Suthers encourages our students to be active custodians of our planet. Year 8 are presently studying Ecosystems and in particular Coral reefs, Bamboo forests and Mangrove forests, with a focus on climate change and how these ecosystems are being affected but also how they can help in the fight against climate change. This piece of work was an introduction to the larger world ecosystems known as biomes, geography lessons zoom in and out of locations around the world and this work shows the macro scale of ecosystems. Students were asked to create their own annotated map of where these forests, deserts and grassland are found with supporting information on climate, vegetation, and animals. I think you'll agree they did an amazing job!

WHAT ARE YOU COOKING?

A recipe to try at home this week...

#NEWLEVELPORRIDGE

Take a look at @thebodycoach on Instagram and his new level porridge bowl. What topping can you create for your morning porridge?

Send us your ideas on Instagram
@thesuthersschool

HOW ARE YOU FEELING?

It's Children's Mental Health Week and charity, Place2Be are focusing on the theme of 'Express Yourself'! Visit the Place2Be website to access great resources and an introductory video for the week.

WHAT IS YOUR CHALLENGE?

Be a BEDROCK CHAMPION!

Our top 5 students who have made the most progress on Bedrock this week are...

1. Finley—Year 7
2. Lucy K—Year 9
3. Olivia B—Year 5
4. Emily—Year 8
5. Adam—Year 8

Remember you can complete two Bedrock lessons per day, try to make it to the leader board next week!

WHAT ARE YOU READING?

This weeks reading recommendation...

Love The Hunger Games?

Suzanne Collins published a prequel to the trilogy in 2020 and it tells the story of Coriolanus Snow, the well-known authoritarian ruler of Panem.

Worth a read if you enjoyed the originals, or a place to start if you've never read them.

If you've read a great book recently please let Mrs Brown know and you could be featured here next week!
