

## **Humanities**

At The Suthers School we are determined that our pupils are prepared for a future as global citizens and we know that a good grounding in the Humanities is essential to this. Through the discreet study of History, Geography and Philosophy and Ethics, we seek to bring alive our world, its history and its beliefs and values.

By teaching the three separate subjects we believe we will enable pupils to develop the specific subject-related skills needed for GCSE and beyond. In Years 7 and 8 our students have two lessons of Geography and History a week and one lesson of Philosophy and Ethics a week.
